

Are You
jQuery?

Are You
HTML?

Are You
CSS?

Are You A
**Document Object
Model?**

Because you `addClass()`
to `$(this)` place.

`{<3}`

Because I want your `<body>`
near my `<head>`

`{<3}`

Because everything about you is
`important` to me.

`{<3}`

Because I want to traverse
your `<body>`

`{<3}`

Are You A
Private Variable?

Are You An
#ID?

Are You A
.Class?

Are You A
Closing Tag?

Because I am only declaring
my love for you.

Because you are so unique that
I only want to select you.

Because I want to declare your
style everywhere.

Because you complete me.

Are You A
Function?

Are You
JavaScript?

Are You An
Event?

Are You An
Array?

Because I'd love to call you.

{<3}

Because I like it a little vanilla.

{<3}

Because I want to be bound to you
when we interact.

{<3}

Because I think we'd make a
key-value pair.

{<3}
